CMMI IS A FRAMEWORK

- ▲ Not a standard
- ▲ Not a prescription
- ▲ IS a description
- ▲ CANNOT be cookie cutter (and still work well)
- ▲ Does not require purchase of software or tools
- ▲ Meant for process **improvement**, not process **compliance**.

IMPROVEMENT NOT DEFINITION

- ▲ The *model* is not the *process*!
- ▲ CMMI is full of practices to IMPROVE your processes, not to DEFINE your processes.
- ▲ You likely have practices of your own in most/all process areas.
 - ▼ Probably by other names.
 - ▼ Likely generating their own appropriate work products.
- ▲ CMMI's practices are meant to improve *those* activities.
- ▲ If you're not doing an activity, it's probably a good idea to do it, so you could do worse than consider it.

PROCESS AREAS (PAs)

- ▲ There are 22 Process Areas in the entire CMMI-Dev.
- ▲ Each PA describes:
 - ▼ One set of goals and practices that make up the process area: **Specific Goals** and **Specific Practices**
 - ▼ And one set of practices that are shared across all process areas: **Generic Goals** and **Generic Practices**

THE TECHNOLOGY STRATEGY COMPANYSM

33

SPECIFIC GOALS (SG)

- ▲ Each Process Area has at least 1 Specific Goal
- ▲ All the Specific Practices are organized by which Specific Goal they help organizations achieve.
- ▲ The Goals are what organizations are **required** to pursue.
- ▲ While the *Practices* are what organizations are **expected** to perform, they can be swapped with alternative practices.

28-APR-08

THE TECHNOLOGY STRATEGY COMPANYSM

34

SPECIFIC PRACTICES (SP)

- ▲ What organizations are “expected” to actually *do* in order to achieve a Goal is described in some number of Specific Practices.
- ▲ Most Goals have several practices.
- ▲ The straightest line to achieving a goal is to perform the practices.
- ▲ *The “straightest line” may a matter of perspective. Do not assume every practice is right for you.*

35

GENERIC GOALS (GG)

- ▲ Every Process Area has the same Generic Goals with “fill-in-the-blank” differences for each PA.
- ▲ Choice of “Staged” or “Continuous” representation determines which Generic Goals are required for a level rating.
- ▲ “Capability Level *N*” implies that you are performing all the SG/SPs in a PA + all the GPs in through GG *N*
- ▲ GGs imply how “deeply *institutionalized*” your practices are...

Translating technology dollars into business sense.SM

©2005-8 ENTINEX, INC. ALL RIGHTS RESERVED *** PROPRIETARY***

28-APR-08

THE TECHNOLOGY STRATEGY COMPANYSM

36

GENERIC PRACTICES (GP)

- ▲ GPs in each GG describe what you're doing to "*institutionalize*" the SGs and SPs.
- ▲ @ GG 1 you are barely executing the PA's SPs from project to project.
- ▲ @ GG2 you are making a conscious effort to plan, track, and ensure the success of each PA's SPs. It may look different from project to project, but you're doing enough work each time to get it right.

Translating technology dollars into business sense.SM

©2005-8 ENTINEX, INC. ALL RIGHTS RESERVED ***PROPRIETARY***

28-APR-08

THE TECHNOLOGY STRATEGY COMPANYSM

37

GP STUFF CONTINUED

- ▲ @ GG3 you have a single set of defined processes that each project uses and tailors to their specific instantiation. With a single set, you can now start to collect and feed-back improvement data on the processes.
- ▲ @ GG 4 you will be using the data in GG 3 to manage the processes using numbers, not just management oversight. "Quantitatively Managed"
- ▲ @ GG 5 you're able to use computational methods to predict process performance, to anticipate process issues, and to create an environment in which you can really get creative with what you improve, how you improve, and when.

28-APR-08

THE TECHNOLOGY STRATEGY COMPANYSM

38

WHAT'S "REQUIRED"?

- ▲ Goals are **REQUIRED**
- ▲ Practices are *expected* not required
 - ▼ You've 'got' to be doing "something" to be achieving a goal.
 - ▼ If you don't already have good ideas for how to achieve a goal, the practices are a good place to start.
- ▲ Everything else is "commentary"
 - ▼ Which can be helpful if the goals or practices aren't self-explanatory.
- ▲ *Don't assume you and CMMI use terms the same way.*

HOW WE DETERMINE FI, LI, PI AND NI

▲ Objective Evidence

▼ Direct Artifact

- Direct output of a process/practice, e.g., the process says "write a plan" and the DE is the plan

▼ Indirect Artifact

- Some item that clearly shows a process was being followed e.g., meeting minutes in which a process/practice was addressed

▼ Affirmations

- Verbal (written or oral) communication to the appraisal team that provides positive corroboration of a process.

TYPICAL ROAD MAP

- ▲ Goal Analysis
 - ▼ Where are you relative to the CMMI?

- ▲ Training/Knowledge Transfer
- ▲ Process Improvement
 - ▼ Assuming you "ain't all *that*"
 - ▼ Process creation and deployment
- ▲ Process Institutionalization and Normalization
- ▲ Appraisal Prep

FACTORS THAT AFFECT TIME AND COST

- ▲ Where you are w.r.t. CMMI?
(i.e., Goal Analysis Results)
- ▲ How "process-oriented" is your company?
- ▲ How much work will your company do on its own?
- ▲ How much work will your company need help doing?
- ▲ How much progress do you think you'll be able to make?
- ▲ How quickly?

STOP!

- ▲ You really must answer some questions of yourself before you even embark upon the SCAMPI journey.
 - ▼ Why do you want one?
 - ▼ Can your reason be justified in business goals?
 - ▼ Can your business goals be qualified in ROI?
 - ▼ If you're not the one who calls the shots, who is and will that person give you the resources to get through this successfully?

PROCESS SILOS

- ▲ PAs in a vacuum.
- ▲ Each PA is self-contained in it's own silo.
- ▲ For each PA instance, practices are planned, performed to its plan.
- ▲ Can be implemented w/out affecting 'real' work.
- ▲ Adds layers of process overhead & paperwork.
- ▲ Makes appraisers' jobs easier.
- ▲ Makes developers' jobs harder.
- ▲ Least "Institutionalization"

A WORD ABOUT THE GPs

- ▲ Generic Practices:
 - ▼ Establish an Organizational Policy & a Defined Process
 - ▼ Plan the Process
 - ▼ Provide Resources
 - ▼ Assign Responsibilities
 - ▼ Train People
 - ▼ Manage Configurations
 - ▼ Involve Stakeholders
 - ▼ Monitor & Control the Process
 - ▼ Objectively Evaluate Adherence & Collect Improvement Information
 - ▼ Review Status w/Higher Level Mgmt

GP DISCUSSION

- ▲ Generic Practices
 - ▼ Same in every PA
 - ▼ Refer to the SPs of the respective PAs
- ▲ The Silo'd Approach:
 - ▼ Is mechanical and simple (minded)
 - ▼ Good for companies with lots of overhead
 - ▼ Requires these be done for every project
 - ▼ Often unrelated to:
 - what the actual work is
 - when the actual work is done
 - when practices are used
 - ▼ Most often, very disruptive
 - ▼ Too easy to "get wrong"

... AND WITH

- ▲ Keeping an eye on profit/waste when designing processes...
- ▲ Ensures processes are not over-designed.
- ▲ Ensures processes are tied to business needs.
- ▲ Ensures processes affecting profit are included.

BENEFITS

- ▲ Uses realistic product, project and process life cycles.
- ▲ Puts recurring practices in one place.
- ▲ Distributes practices into life cycles.
- ▲ Invokes relevant practices at their point of use.
- ▲ Causes $\lim \Delta \delta(\text{productivity}) \rightarrow 0$
- ▲ Most likely to still be in-place after the appraisal = long-term ROI

SILVER LINING?

- ▲ Less Disruption and More Productivity Requires:
 - ▼ More up-front process design.
 - ▼ Deep understanding of Company Context:
 - Technology
 - Processes/Practices
 - Culture
 - Project types and style
 - Customers
 - ▼ Deep understanding of CMMI.
 - ▼ Deep understanding of SCAMPI process.
 - ▼ More work by the appraiser.
- ▲ Lasting results and *real* ROI require *real* investment and *real* discipline.

APPROACH SUMMARY

- ▲ **Process Silos** = *Bureaucracy*, wasteful, or Overlaying processes onto work you're doing strictly for the purposes of generating evidence, thus adding overhead and disruption to productive/billable work. Increased *production* without necessarily increasing *productivity*.
- ▲ **Process SolutioneeringTM** = *Designed Processes*, or Mapping your "reality" to CMMI. Wherever practices or alternatives aren't done, they are added consistent with value-added productive work.

SOLUTIONEERED PROCESS VS. "PROCESS SILOS"

▲ Solutioneered Processes

- ▼ Lasting Benefits and ROI.
- ▼ Can be appraised repeatedly without re-inventing evidence.
- ▼ Requires up-front process engineering.
- ▼ Requires expertise in CMMI and company's operations.
- ▼ Can cost more up-front.
- ▼ Establishes foundation of improvement.
- ▼ Appraisal simply looks at ordinary output of processes.

▲ Process Silos

- ▼ Focused on getting through the appraisal (only).
- ▼ Short-term results.
- ▼ Requires less expertise.
- ▼ Can be faster and cheaper (short term).
- ▼ Each appraisal requires renewed preparations.
- ▼ Staff perceives effort as "make work" w/no value added.
- ▼ Difficult to connect appraisal results to actual improvements.
- ▼ Appraisal looks at data created just for the appraisal.

CONDUCT INTERVIEWS

- ▲ Not focused as much on:
 - ▼ 'evidence' as much as on existence or absence of practices
 - ▼ Not focused as much on process areas as on practices
- ▲ Looking for your "hidden" processes.
- ▲ Starting the search for your underlying process architecture.

INTERVIEWS TO FIND

1. Do you have a written process that calls out a practice and is there indication that you follow it?
2. Are you performing a practice even though you don't have it formally defined?
3. Neither 1 nor 2.
4. It's not formal, and it's not exactly "done" but if you talk a lot and we look in enough haystacks it starts looking like you're doing it.
